I'm a full-stack developer who builds complete software solutions — from idea to launch. I've worked on everything from real estate platforms to creative desktop tools, always aiming for clean code, smooth user experiences, and systems that just work. Clients count on me for reliable delivery, clear communication, and results that last.

💼 PROFESSIONAL EXPERIENCE

01/2025 – present

Edero AI, Software Engineer and Tech Lead
Leading the technical design, development, and maintenance of a comprehensive web-based system for creating social media content. Responsible for researching technologies, defining the system architecture, and driving implementation.

05/2024 – present

Duende Sounds, Software Developer & System Administrator
Developed a desktop application for an audio tech company to create, manage, and generate sound effects, including AI-powered audio. Handled research, design, development, and testing with a strong focus on UX and performance. Also built internal tools, automated workflows, and managed infrastructure.

05/2023 – present

Actiflow Sp. z o.o, Software Developer & System Administrator
Led the full development lifecycle of real estate SaaS platforms—from research and design to implementation, testing, deployment, and ongoing support. Created and maintain web scrapers that provide reliable and continuous data collection and processing

04/2023 – 05/2023
Kraków, Poland

Sano Centre for Computational Medicine,
C# Software Development Intern
Worked on an experimental project developing C# and Unity code to integrate a robotic arm with VR glasses and haptic gloves. The project explored advanced interaction techniques within a company focused on medical technology research.

01/2023 – present

Freelance, Fullstack Software Developer
Work closely with clients to turn ideas into working web apps, web scrapers, automations, and APIs. Handle everything from planning and development to deployment and support. Projects include real estate platforms, desktop tools, and internal systems that help companies run smoother.

08/2022 – 09/2022
Niepołomice,
Poland

BLOOM Sp.j, ASP.NET Core Software Development Intern
Developed web applications using C# and ASP.NET ⧉ to support billing and invoicing processes. Created features for invoice generation, export functionality, and designed APIs to integrate billing and invoice systems.

🎓 EDUCATION

09/2020 – 05/2025
Niepołomice,
Poland

Programmer technician,
Zespół Szkół im. Ojca Świętego Jana Pawła II w Niepołomicach
Awarded a scholarship for outstanding academic performance in vocational subjects. Completed certified EU-funded training courses and participated in summer internships to gain practical industry experience.
